Target Groups: Female Faculty and Girl Students

Knowledge Acquired by the Event:

It was an activity-based workshop where girls were excited and happy to share their views with the Graphene Campus connect team. The objective is that girls from an early age should get knowledge about physical changes during the puberty stage as well as need to know information about proper menstrual and feminine hygiene. The session included interactive activities, where students were encouraged to ask questions and clarify their doubts.

The session also highlighted the importance of proper disposal of menstrual waste and how to prevent the spread of infections during menstruation. There are many questions that restrict girls & women to live with confidence and it really needs to be clarified to spread happiness and well-being. During the journey of the Graphene Campus Connect, the team has tackled lots of such questions.

The girls received free sanitary napkins as a mark of participation and motivation and to encourage others to follow feminine hygiene as well. The session was well received by the participants, and they expressed their appreciation for the efforts made by the organizers.
