

IPR Cell Formation

Purpose

An Intellectual Property Rights (IPR) cell or department is typically established within an organization to manage and protect intellectual property assets, including patents, trademarks, copyrights, and trade secrets.

In SLRTCE, IPR cell was established in AY 2018-2019, with a vision of creations of mind, inventions, literary, artistic works, symbols, names and designs; for which a set of exclusive rights like copyrights, trademarks and patents are recognized.

The primary functions and purposes of an IPR cell are as follows:

Protection of Intellectual Property: The IPR cell is responsible for identifying, registering, and protecting the organization's intellectual property assets. This involves filing patent applications, trademark registrations, and copyright protections, as well as safeguarding trade secrets.

Enforcement of Rights: The IPR cell ensures that the organization's intellectual property rights are enforced. It monitors for potential infringements and takes legal action when necessary to protect these rights.

Risk Mitigation: By actively managing intellectual property, the IPR cell helps reduce the risk of infringement or misappropriation, which could harm the organization's competitive advantage and financial interests.

Innovation Support: The IPR cell often plays a role in fostering innovation within the organization. It can encourage employees to create and protect new intellectual property and ensure that inventors and creators are properly recognized and rewarded.

Compliance: Ensuring that the organization complies with intellectual property laws and regulations, including international treaties, is another critical purpose of the IPR cell.

Documentation and Record Keeping: Maintaining comprehensive records of all intellectual property assets, registrations, agreements, and enforcement actions is essential. This helps in tracking and managing IP assets effectively.

Education and Training: The IPR cell may conduct educational programs to raise awareness about intellectual property among employees and stakeholders. Training can help prevent accidental IP infringements and increase understanding of IP-related issues.

Strategic Decision Making: The IPR cell provides information and insights that can inform strategic decisions regarding the organization's intellectual property portfolio. This includes decisions related to asset acquisition, divestiture, and licensing agreements.

Continuous Improvement: Regularly reviewing and updating IP management strategies and policies to adapt to changes in IP laws, business needs, and technological advancements is an ongoing purpose of the IPR cell.

Continuous Improvement: Regularly reviewing and updating IP management strategies and policies to adapt to changes in IP laws, business needs, and technological advancements is an ongoing purpose of the IPR cell.

In summary, the IPR cell plays a vital role in safeguarding and maximizing the value of an organization's intellectual property assets. It helps protect against infringement, supports innovation, ensures legal compliance, and contributes to the overall competitiveness and success of the organization.

Vision

"To be catalyst for Innovation and Excellence through strategic Intellectual Property Management"

Mission

"At SLRTCE IPR cell our mission is to utilize intellectual capital within our organization and transform it into a catalyst for innovation and progress"

In 2018-19 the IPR committee was formed with following members

Sr No	Role	Name	Designation
1	Chairperson	Dr. S ram Reddy	Principal
2	Convener	Mrs Manjiri Gogate	Assistant Professor ETRX dept
3	Members	Roshan Mishra	Assistant professor, Mechanical Department
		Sonali Padalkar	Assistant Professor, EXTC Department
		Aabha Patil	Assistant Professor, Computer Department
		Prajkata Mukadam	Assistant Professor, Civil Department
		Madhuri Ghedam	Assistant Professor, IT Department
